# ADVANCED PLACEMENT

---

- Advanced Placement exams are developed by a committee composed of higher education faculty and expert AP teachers who ensure that the course reflects college- and university-level expectations. The committee works with ETS (Educational Testing Service) to develop multiple-choice and free-response exam questions. Committee members also write and review the course description for each subject.
- AP exams are scored on a 1 - 5 scale. Depending on university and college guidelines, students may use successful AP scores to replace college courses.

# ADVANCED PLACEMENT DATA TRENDS & ACTION PLAN

---

- Biology, Environmental, Seminar, US History, US Government and Politics, Psychology
  - These classes fell short of the state and / or global performance averages.
  - Teachers, along with their department supervisors, are reviewing student performance trends over the last five years of test administration.
  - Department supervisors are facilitating correlation analysis of classroom grades and AP exam performance to ensure there are high expectations and rigor that aligns with the AP exams and College Board.
  - Department supervisors and teachers will collaboratively review student performance and assessment materials throughout the year to benchmark progress with these goals.
  - Those courses underlined have not been identified as “in need of improvement” prior to the AP test being taken at home during the Spring 2020 administration
